This character pack is totally worth it! The characters look nice, and they're well adapted to the aesthetics of the game while remaining faithful to their original design. I like to imagine players' reaction online when they see their opponent is Octodad.

Also, to be honest, I got the game in a Humble Bundle, and buying this is a way for me to give a fairer amount to the devs. I have 30+ hours of play time and counting, and for me this is well worth a few extra bucks here and there.. Very simple game, no tutorial, only in the settings.

Z = Animal Power

X = Throwable/Weapon

C = Jump

LEFT AND RIGHT ARROW KEYS or A D

Kind of overpriced £6.99 for a NES inspired game.

I died at the beginning because the food was too far from the starting area.. The BEST MLG videogame EVER!

4/5. boring, waste of 99 cents. there is really only 10 minutes of content, and its very confusing the first time around

Need the horn to be fixed. That is my only complaint. Interior sound of horn is like a BR steam engine whistle. Exterior sound is delayed/unreal.. Buy the cheapest game with Steam Trading Cards

Install the game

Get the cards

Sell the cards

Make profit

Uninstall the game

. Although the game is rather short but a lot of meaning is conveyed.

The pictures is also good and its OST are nice and have a calm atmosphere.

Good work Mojiken Studio & Toge Productions, :). I know why they call this game TrackMania, not because of the actual race courses... But because of the absolute crankers coming from the in server radio!. Shame....all other dlc works on mac.....why not this one????
