About This Game

Loca-Love is a kinetic visual novel (without any branching routes) with art by nanaca mai, of Corona Blossom and Grisaia fame, and a story by Japanese writer Hozumi Kei, famous for his sweet and romantic love stories. It follows the exciting but slightly awkward love life of protagonist Aoi Ichitaro after he moves in with the dreamy and beautiful girl he's had a long-time crush on...

STORY:

Aoi Ichitaro had been living on his own, until disaster strikes at his apartment and he's temporarily evicted. However, his misfortune turns out to be a blessing in disguise...

"Y-You're... free to come and stay at my place!!!"

Kojika Hiwa - Ichitaro's coworker at his part-time job - seems to have gathered all her courage to invite him over. Ichitaro, who had already taken a liking toward her, happily accepts, signaling the beginning of their new life together. At first, things are awkward and embarrassing, but once the two become aware of their mutual feelings, their life takes a turn for the sweet. Sleeping, eating, going to school... every moment of the day is pure bliss when spent together with the caring and homey Hiwa. Naturally, Ichitaro wishes that they could keep on living together forever. There's just one thing he needs to do to make that happen...

Online-community-ONLY game with completely dead online community.

If you buy this you might as well just light your money on fire. (Not counting if you want to just play with friends and each buy a copy.). Great gameplay.

-Active Dev thats quick to bug fix and actually listens to the players.

-Cheap price for what you get.

If you own a VR headset, love space and want a decent survival game there is no reason to pass this game up.. Bought it when it just came out on steam at \$1.60. Now selling for \$10.50. Rip-off much?. Holy\u2665\u2665\u2665\u2665\u2665..

I don't know what to say..., it's just so \u2665\u2665\u2665\u2665ing amazing. Honestly.

If that's not the best way to improve your aim at any aspect, idk what will do it.....

I got so \u2665\u2665\u2665\u2665ing much reflexes and tracking than before, in all my fps games that it's literally creepy.

If you want to improve your aim really fast, just search some workout routines on internet for KovaaK and try them.

Ofc you'll not be a god in 1 day, that's kinda obvious, but do your workout properly, your aim will be so much smooth and tracky than before.

I just played 10h and my aim is already way better than before..

All my friends always said that my aim is \u2665\u2665\u2665\u2665ing tracky and insane, lol, I want to know what will be their reactions now owo

SOOOO, just play it, onegai ~ (that's \u2665\u2665\u2665\u2665ing worth the price). As of now the game is riddled with bugs..

I could barely complete 2 missions without alt+F4, there is just too many bugs.. Wow oh wow. Love me some Drawful 2. Very fun game to play with your family and friends. Although make sure that the place you are playing it at has a strong enough internet connection because sometimes it can get fuzzy. I would recommend buying this and Quiplash, because they are the best on the Jackbox.. It's okay, kinda cute, but the controls are bad and it has bad reviews this is a satire, obviously other people's reviews don't influence my opinion

i highly recommend this game for people who likes love storys and cute neko girls plus reading.. It's, okay, just a wave shooter in the dark. It isn't too bad but a bit pricey for the amount of content it has.

If you find it on sale, sure, go ahead and grab it.. The last thing I expected from this, when looking at the screenshots and reading the description after finally buying it being in my wishlist for 3 years, was that this is a puzzle game and fantastic for Portal/QUBE fans. Really addictive and runs on the Unreal engine, which this game truly shows the best of Unreal and how other games can have better or worse graphics with this engine. Quite simply - If you like Portal, this is a must for you!. Absolutely fantastic game. A great blend of strategy and boardgame-like play. I really enjoy the fact that you can play through an entire campaign in a few hours, and then start again with a completely different crew. I've been having a blast.. Doesn't seem to work... Need help :(

patch 1.4.1:
